

The TCB extension holder extends the body of the shear wrench by 100mm.

This can be attached to the tool in the normal way and needs the standard TCB socket to be attached to the end.

Only one extension holder per model series is required as all compatible diameter standard sockets can then be added.

Shear Wrench	Bolt $\varnothing$	D (mm)	L (mm)
GM160 CSM160	M16	53	100
GM220 CSM220	M16	57	100
	M20		
	M22
